“

It looks fantastic and I feel safe in the knowledge that I won't have to treat it every year as you do with wooden decking. I would highly recommend this product to anyone without hesitation at all. So glad I found them and hope many more people do the same.

Mark, Trustpilot

“

After talking to a really helpful lady, she gave an approximate quote for us to know roughly what we were dealing with. Extremely helpful advice and downloads sent to my email.

Tricia, Trustpilot

Explorer specification

Description
Low-maintenance, enhanced durability and supported by a 15-year warranty, Explorer will save you time and money every year over standard wood products.

Dimensions	145 x 21 mm profile 4 m lengths

- 25 year Fade and Stain warranty
- Conceals deck sides and substructures
- Colour matched with Frontier

Case Study ★★★★★ Artist Retreat

“

The existing timber deck was rotten, and we wanted to replace it with one that would have a substantial shelf-life. We were looking for something high-quality that wouldn't become slimy or discolour over the years.

This composite decking was the perfect solution; with a quick jet wash at the start of each season, it's back to looking freshly installed.

Charlie Avara, Managing Director, All Done Design

Pictured: Maple Outdoor Porcelain Paving

As a builder, the product has been on my radar for a long time. Hyperion has become the go-to decking product that I recommend to all my clients.

Case Study ★★★★★ Luxurious Pathway

“

Firstly, it has to be said that the Explorer decking board path looks amazing and laying the path using their fittings was truly simple. The embossed wood grain finish is very effective and the look is set off nicely by the 6 mm gaps. The surface is flat, matt, and completely firm to the step even in the wettest of conditions; something that can definitely not be said of wood decked walkways.

Malcolm Sheppard, Slinky Studio

Pictured: Silver Birch Explorer

The pathway is very comfortable to walk on, with just a little springiness to the material; it's also very quiet. The great thing is that not only are we helping the environment and saving trees, but we have produced a pathway that needs no maintenance; no staining, oiling or future rotting, truly a path for life!

Hidden fasteners

6 mm Hidden Fasteners

- Creates a 6 mm gap between deck boards
- Seamless finish with quick and secure installation

Hidden Starter Fasteners

- Ensures the perfect fit and reduces surface screws
- Seamless finish with quick and secure installation

You may also need...

Coloured Screws

- Box of 100 colour-coated stainless steel screws, colour matched for the Explorer and Frontier ranges
- 6 mm head, 4 mm thread, 35 mm length
- Multi-purpose, perfect for installing corner trims and fascia boards

Weed Fabric

- 2x20 m (40 m2) weed fabric roll
- 100 gsm UV resistant material
- 3 years warranty
- 100% recycled polypropylene

Decking support

Plastic Joists

- 50x50, 50x100, 50x150 mm profile joists in 3.4 m lengths
- 100x100 mm profile posts available

Made with
100%

Recycled
Material

Adjustable Supports

- 10–740 mm height range
- Joist cradles, slope correctors and protective mats available

Made with
90%

Material

Feel supported

With many more decking support options and accessories to suit your project.

Easy installation

Save precious time

With **easy-to-use hidden fasteners**, everything clips into place neatly.

Enjoy a seamless look

With a revolutionary **hidden fastener system** that will leave your deck with a **flush, screwless finish**.

Fix starter clips to the outer edge of your deck.

Slide the first board into the starter fastener.

Install hidden fasteners to fit the next board in place.

Tighten hidden fastener screws to secure the boards.

Feel confident in making the sustainable choice

We endeavour to provide the most sustainable products on the market. Here's why your purchase can make a positive impact on the environment.

1 million kg plastic diverted from landfill annually.

That's the equivalent of 52.6 million plastic bottles.

We use wind power

From 2021 Hyperion Composites have been manufactured using **100% renewable wind energy**. This gave Hyperion Composites a **carbon footprint (CO₂e) reduction of 33%**.

87% recycled material

This includes 57% recycled wood powder, 30% recycled HDPE, 6% stone powder and 7% additives.

Environmental impact (CO₂e/ kg) reduced 32.6% since 2020

Hyperion decking boards will produce up to 64% less CO₂e across its lifetime than softwood timber decking boards.
